*When six space delegates, who have lost their worlds are pulled into an ancient Star Dragon war, they must use their extra-sensory abilities to join the fight, reverse a prophecy and return home.*

- I. When SPOOBIS, a boy, loses consciousness during experiments that turn his body in to a 'super', he later wakes up inside a 'donut core' room with a 360° view, with a spacious, battleship's bridge, just outside the donut core. Spoobis discovers 1. He's trapped inside a room in his own, sleeping body 2. His "twin," BRAHM, whose favorite topic is murder by numbers, is here and 3. They each have *power plugs instead of legs*. Whomever reconnects first to the Motor Function Port (MFP) in the control room, gains command of their body however, a sudden, surprise invasion by a group of strangers, who 'hot wire' the MFP, foils the plan. Once the twins discover they feel each other's pain, they must work together to escape. Only one will awaken the sleeping boy, who will bring them destruction, or bring them home.
- II. On a distant planet, which is freezing over, a supernova lights the sky, ELSIA and OBIE run for their lives from a pack of wild animals, toward 'the room inside the mountain.' Their plasma-shooting lamp and KELPHUS, a Star Dragon, helps them to safety. Elsia uncovers the comatose SPOOBIS and prepares a podship. Kelphus chases the podship toward a wormhole and intercepts three, fighter ships after it, careening them toward INGLEDEENG's battleship, where all but one crashes. As Ingledeeng's envoy is attacked, thunders of Star Dragons appear to reclaim stolen stars from their own universe. Awaiting in orbit, Autopilots, Glyzzy and GunnaCuke, *download their consciousness into Spoobis to reconnect his MFP*. They "hotwire" him and pace themselves for a long mission. Kelphus and DRIDEON follow Spoobis to the birthplace of *Leathos*, the central, "home" planet of our saga.
- III. Long ago, three, corrupt STAR DRAGONS - a weapons maker, an explosives expert, a journalist and *their* mastermind, NEREZZA, discover a cryptic poem. It gives them cover for their plan to secede from the Star Dragon universe. Nerezza shapeshifts to look like the writer of the poem - BRAZZ - and commit horrible crimes in his likeness. They design a frequency causing nearby stars to produce drops of technological glass and metal for tools, weapons and ships. As Nerezza forms an arsenal, a chunk of the Star Dragon planet (and many stars around it), phase into a starless quadrant *in our story's universe*, leaving their own planets to die. A war begins as Star Dragons fracture into those who join Nerezza, those who try to stop him and those caught in a crosshairs they neither want, nor understand.

**THEMES:** *Things are often not as they seem. Sometimes bad things happen to good people. Never underestimate the power of small groups. Too much technology is dangerous. Not enough technology is dangerous. Home is usually where you left [it].*
